

RBN U.S. Crude Oil GUSHER

Supply-Demand Analysis & Outlook

Overview

U.S. crude oil production has doubled in the past eight years, precipitating major shifts in transportation, storage and price dynamics.

The *RBN U.S. Crude Oil GUSHER* is a weekly supply and demand forecast report released in conjunction with the EIA's Weekly Petroleum Status Report. *The GUSHER* report combines current data and analysis with proprietary forecasts to provide subscribers with actionable knowledge and insights about how and why crude oil markets are shifting.

The report features a breakdown of the crude supply and demand balance; domestic inventory levels, with a focus on Cushing stockpiles, and their impact on U.S. crude fundamentals; and the major infrastructure, commodity and industry news driving crude price movements — all displayed in an easily digestible format.

Key Features

Weekly highlights and full-year forecasts of the U.S. crude oil supply and demand balance, including production, storage injections, withdrawals and inventory levels, imports/exports, and refinery runs

In-depth analysis and forecasting of U.S. and Cushing inventories

Demand-side data and insights, including refinery operations, products and export activities

PADD-level discussion of rig counts, production, refinery inputs, and crude oil and products inventories

Breakdown of major infrastructure, commodity and industry developments

Benefits

Stay ahead of pivotal inflection points in the crude market

Anticipate price shifts based on the latest inventory data

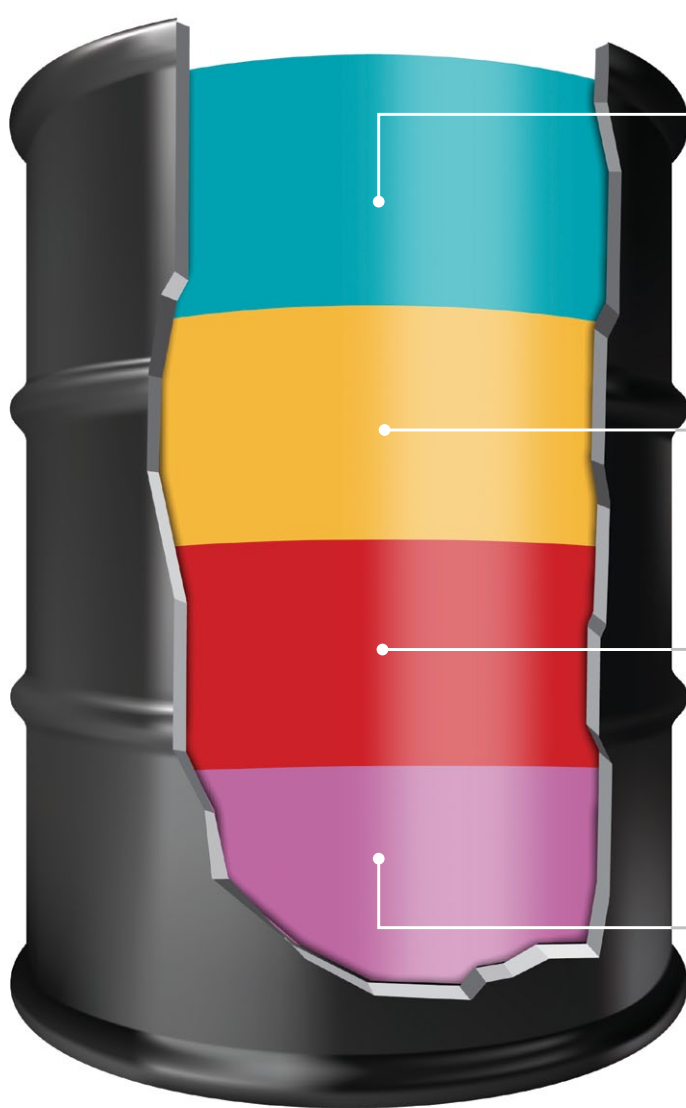

Identify potential upstream impacts of demand trends

Understand the regional drivers of U.S. crude supply and demand fundamentals

Quickly assess the impacts of the complex factors driving U.S. crude prices

LOW COST = HIGH VALUE: At only \$55 per month the Crude Oil GUSHER offers tremendous value and is affordable to even the independent trader.
